

Tekeze Dam in Ethiopia

Application Field: Dams / Hydropower
Place: Tigre, Ethiopia
Date: 2009
Products: 1 x VAG KSS Hollow Jet Discharge Valve DN 1600

Project description:

With its 185 m, the Tekeze Dam is the highest dam in Africa.

VAG service technicians commissioned the hollow jet discharge valve with a diameter of 1600 mm and assembled its actuator.

The hollow jet discharge valve is installed at a height of 90 m and serves as a water discharge valve. If required, up to 71,000 litres of water per second can be discharged from the reservoir.

Installed VAG KSS hollow-jet discharge valve

The Tekeze Dam, located at about 1000 m ASL
